### Activity Overview

DDV Elettronica is an Italian company based in Fara Vicentino, in the province of Vicenza, active in the electronics sector for over 30 years.

Specialized in the assembly of printed circuit boards (PCB), it offers SMT (Surface Mount Technology), THT (Through-Hole Technology) and painting assembly services, using cutting-edge technologies to ensure high precision and reliability of the product.

### Product and Services

The company has SMT and THT departments, automated warehouses, 5 Pick&Place lines and control systems (AOI, SPI, X-RAY); to which are added: a customized design, testing and painting service. Based on the customer's requests, the company is able to provide complete or partial supply of materials. Thanks to all these services, the company is now able to cover a wide range of sectors, from the automotive to the railway sector, from air conditioning to home automation, consolidating a solid position in the electronics market.
